How to sell JAST USA's "Hentai" Games

While we love the "hentai RPG" game genre, we admit that not every member of the hentai-buying public may understand how the games work, without some help from you, the Retailer. Pick up an anime video, and you immediately know what you're getting—30-45 minutes of hentai animation, period. But many potential customers might not "get" the hentai RPG formula if they haven't played the games before. Here, we offer some "quickie" ways of describing JAST USA products to your customers, to pique their interest and make them want to know more.

The hentai RPG genre in general: As a

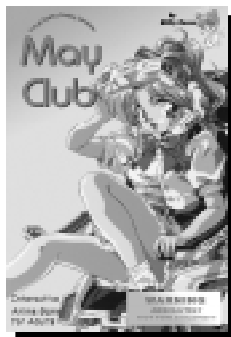

rule, "hentai" adventure games are simulation-type role-playing games in which you are a male character, interacting with female game characters through on-screen menus. You progress through the story, trying to have sex with as many of them as possible (or just one character, depending on the game). On-screen graphics are stills with some panning/scrolling graphics, but the game characters have animation -- eyes blink, faces and body positions change. Game play can be anywhere from a few to ten hours or more, depending on the game and which company made it.

Three Sisters' Story, Season of the Sakura, Runaway City: The original JAST USA classics, these games feature long playing time (7-10 hours per play), lots of great adult images. Three Sisters' Story and Runaway City are somewhat linear in that there is one "correct" ending that you're trying to get to, to finish the game (along with several "bad" endings). They have good action-type stories with lots of sex. Season of the Sakura is more of a "romance simulator" in which the player must interact with the female characters,

deciding on one he wants (with game sex coming after he clears a certain character).

Nocturnal Illusion & May Club: Two very popular releases by Excellents Japan and Milky House, these two titles feature a variety of game endings and great replay

value. They also have the most updated Windows game engine, and long playing time, and have good reputations with users.

Otaku Publishing Games: The four titles from Otaku Publishing, a British company, are unique in that they have the Japanese game voices playing while the English text appears on the screen. The games are not as long (3-5 hours playing time), but the Japanese voice-over may be good for anyone looking to learn a little Japanese.

Hentai Anime Poker & Expansion Packs: An excellent strip poker engine makes Hentai Anime Poker a great game, with excellent replay value. And with the "expansion pack" CD ROMs, the player can add classic anime characters, making for an excellent hentai experience. The game features five different poker games, on-screen help with poker rules, and a really challenging computer poker engine.

Sound Bites

Often, you only have 5 seconds to sum up a title's "core" for a customer, especially in a crowded convention hall or store. Here are the sound bites to remember about each title we sell:

Three Sisters' Story: "An erotic adventure, you're in a plot with your older brother to get revenge against the man responsible for your father's death, and his three daughters. But you realize that you've fallen in love with the three sisters, and must somehow stop your brother from forcing them into a life of sadness and prostitution."

Season of the Sakura: "A romantic simulation with great characters. You

interact with eight different girls over the course of a normal school year. When you decide which one you truly love, you have to figure out how to woo her. This is my favorite game, because of the well-developed romantic game story."

Runaway City: "You have this mysterious power to make women do whatever you want. As the story progresses, you've got to figure out the nature of this power."

Nocturnal Illusion: "This is the 'Hotel California' of Hentai games. You're trapped in a mysterious mansion from which no one can escape. Your goal is to comfort the women trapped with you, and ease their loneliness, as you determine which one you truly love."

VR Dating Simulator May Club: "You spend six weeks in a virtual-reality world, interacting with eight different characters to fulfill your sexual fantasy. There are ten different endings in this very challenging hentai RPG."

Ring Out: "Experience the world of lesbian wrestling."

Paradise Heights/Return to Paradise Heights: "Sort of the Maison Ikkoku series of hentai games. You've been asked to watch a zany apartment house, and all the sex-starved women who live there."

True Love: "A new idea in hentai games, this title features items and stats. Drink beer, and your judgement stat goes down while your bravery goes up. Your character is female in this game, not male."

Hentai Anime Poker: "A very advanced strip poker game which lets you play strip poker against your favorite anime characters. A great poker engine, with five different poker games including Texas Hold 'Em. A very challenging Poker game that's also great for beginners."

Borderline 2.0 ~Breathe~: "An excellent multimedia CD ROM for Mac and Windows, this disc features three erotic 'digital comics' stories and hundreds of high-resolution adult images, all stored in popular formats like JPG and BMP. You can print all images, or use them as screen wallpaper on your computer."
